Mogul Mine Geologic and Hydrologic Investigation.docx

We had the cost at \$15k but we thought maybe CDPHE had \$25k for each site.
I will wait for you guys to weigh in on the \$15k vs. \$25k before sending it to Mark Rudolph.

I also added a few sentences about potential seals in vertical openings. Allen - feel free to modify anything...

Maybe we will send this off by the end of the week.

Kirstin,

The proposed scope of work looks good. The only thing that I would add is to look at the Shaft on the Mogul and evaluate the options to seal it in the event that water levels would rise if the bulkhead were sealed more effectively.

The GK will potentially require some underground entry tasks pending the outcome of the portal rehab.

The costs may or may not be an issue. I suggest that you submit it as is, and we'll talk with Mark Rudolph to work it out. The sooner you put this in front of Mark the better, so thanks a lot for getting this to me when you did.

Thanks,

Steve
